

Mrs Michelle Paton Primary Teacher and Specialist Teacher of Art and Design and French.

Plan on a Page Primary 1, 2 and Den.

I will be focusing on the art and design skills linking to early and first level benchmarks from curriculum for excellence.

This first term is dedicated to the introduction of the elements of art. Children will learn through artists' and illustrators' techniques using line, formation of closed shape and colour theory practices.

We will also learn STEM links to art and design through collaborative working on a simple design brief.

Children's work is compiled and stored in art portfolios that will be available to parents at parents' evenings to view.

I will also work with the children on displays throughout the school, showcasing work completed successfully by the children.

This term also will focus on fine motor skills and the introduction of different art media. I will be teaching the children how to use the materials and care for them properly.

French is also part of my teaching remit. I will be teaching colour, number, days of the week and months of the year this term. We will learn through song and games within each lesson.
